

The Centro Ufologico Nazionale presents
Mind Maps for the study of the UFO/UAP phenomenon.

PRESS RELEASE

Pursuing the effort of study and dissemination of information that has been the hallmark since its creation in 1967, the Centro Ufologico Nazionale (National Ufological Centre) of Italy, has created an innovative tool to promote the knowledge of the UFO / UAP phenomenon in the form of mental maps. A tool never used before in this area, mental maps have proven particularly useful in understanding complex phenomena.

These maps represent an Italian, if not a world première, in the sector.

The maps, currently three in number but likely to increase in the future, aim to graphically illustrate the three main aspects that characterize the UFO/UAP phenomenon:

- 1) The main characteristics of the phenomenon, that is types of sightings, their CE3 effects and the hypotheses to explain this still mysterious phenomenon.
- 2) The main detectable effects of the UFO/UAP phenomenon's manifestations.
- 3) Who or what would be damaged if the news of the Extraterrestrial presence on Earth were suddenly and unexpectedly released.

After years if not decades, the UFO/UAP phenomenon has recently become topical again on a worldwide scale after last December's news of the Pentagon's secret multimillionaire AATIP program to study UFOs, or UAPs, and on the Italian scale after an important sighting in Piedmont has recently triggered a parliamentary questioning.

Moreover, this year's 80th anniversary of Orson Welles' famous radio broadcast makes this innovative work even more relevant.

The maps are published on the website of the Centro Ufologico Nazionale of Italy at the following url:
